Looks like Edna is on board, so maybe permitting won't be a pain in the arse.

Dear Charles,

Thank you for inviting me to join your research project. It will be a great opportunity to see how are our mussel populations doing.

Let me ask (to our expert on those issues) about the permit information. Previous experience had showed us that it is more easy for you to get permission through our "Secretaria de Relaciones Exteriores".

I will get back to you with the information.

Best regards,

Edna Naranjo
